Financial Responsibility Agreement

Tobacco or nicotine use in any form is a risk factor known to cause significant wound healing complications after surgical procedures. Examples include, but are not limited to cigarettes, e-cigarettes (vaping), smokeless tobacco products, nicotine patches, and nicotine gum. The specialty of plastic surgery places great emphasis on achieving optimum surgical outcomes by selecting patients who are good candidates for a specific operation. It has been observed and reported after a variety of different plastic surgery procedures that smokers have impaired capacity for wound repair and propensity for skin necrosis. **Outcomes of both cosmetic and reconstructive surgical procedures have been noted to be adversely affected by smoking.**

_____I agree to have nicotine tests prior to surgery and as my surgeon feels necessary postoperatively.

_____ I understand that the morning of my surgery I will be tested for nicotine and should my test be positive I will forfeit my surgery deposit and 10% of the surgical fees.

_____ I understand I will have to repay the surgery deposit and 10% of the surgical fees in order to reschedule my surgery in the case my nicotine test was positive.
